Getting started

To use your Bluetooth headset, please follow the steps below:

1. Ensure your headset fully charged.
2. Pair your charged Bluetooth headset with a Bluetooth-enabled phone.

Wearing your headset

Charging your headset

Connect the charger to the charging port and plug into a mains socket. The indicator turns red when charging, and it will turn blue after being fully charged.

Turn your headset on

To turn on your headset, press and hold the MFB for one second till the Indicator flashes three times in blue.

Turn your headset off

To turn off your headset, press and hold the MFB for 5 seconds till the indicator flashes three times in red.

Attention: if you do not use the headset for a period of time, we suggest that you should turn the headset off and the Bluetooth function on your phone as well.

Pairing your headset

1. Place the headset and mobile phone where they are easily viewable to you and no more than one meter apart.
2. Ensure the headset is turned off.
3. Press and hold the MFB for 3 seconds till the indicator flashes red and blue alternately.
4. Activate your mobile phone's Bluetooth function by referring to your phone's user guide.
5. Set the phone to search for Bluetooth devices, and select 'Dacom Stereo' from the list of devices shown.
6. Enter the passcode '0000', and press 'ok' to pair the headset with your phone. After being paired, the headset will be in the standby mode.
7. Now you can use the headset to dial and answer phone calls.

Answering a call

When a call comes, press the MFB once to answer it.

Rejecting a call

Press and hold the MFB for 3 seconds to reject a call.

Ending a call

While speaking, press the MFB once to end the call.

Voice dialing

Press and shortly hold the MFB and say the voice tag according to the phone tips. (your phone must be equipped with voice dialing function).

Last number redialing

In the standby status, double press the MFB on your headset.

Play/pause

Short press the "MFB" button.

Last track

Long press the "⏮/-" button.

Next track

Long press the "⏭/+ " button.

Volume up

Continuously press the "⏭/+ " button, the volume will go up. Every single press of the "⏭/+ " button, the volume will go up a scale, when a beep is heard from the headset, the volume reaches the maximum and will not go up any more.

Volume down

Continuously press the "⏮/- " button, the volume will go down. Every single press of the "⏮/- " button, the volume will go down a scale, when a beep is heard from the headset, the volume reaches the minimum and will not go down any more.

Delete the pairing status

While the headset is charging, press and hold the buttons "⏭/+ " and "⏮/- " for 5 seconds at the same time to delete the pairing status.

Call transfer

Long press "▶▶/+ " key to transfer the call from your headset to your mobile phone(mobile must support transfer function), short press MFB to transfer the call from mobile to headset.

Online standby

After starting the headset, it will connect the latest connected mobile automatically, then get into online standby status if it's with successful connection; or else it will turn off automatically after 5 minutes.

Troubleshooting:

If you are unable to connect your headset to mobile phone, please try the followings:

- * Ensure your headset is started on and is properly charged.
- * Ensure the headset is paired with the mobile phone.
- * Ensure your mobile phone's Bluetooth function is on.
Please refer to your mobile phone user guide for specific instruction.
- * Ensure the headset is within 10 meters range of your mobile phone, and there is no obstructions, such as walls or other electronic devices in between them.

If the above steps don't solve the problem, please recharge the headset or turn off mobile phone then turn on

Safety regulations:

- * Check local laws regarding the use of mobile phones and headsets while driving. Ensure your attention and focus on the road and you drive in a responsible and safe manner if you are using the headset while driving.
- * Never allow children to play with the headset as small parts may cause choking hazard.
- * Observe all signs that require an electrical device or RF radio product to be switched off in designated areas. These areas including hospitals, blasting areas, and potential explosive environments.
- * Turn off your headset prior to boarding an aircraft. Do not use your headset in an aircraft.

- * Never mount or store your headset over any air bag development area as serious injury may be caused when air bag destroys.
- * Don't open or mutilate the inside battery.

Attention: Dispose the batteries based on local regulations. Don't dispose it as household waste.

Care and maintenance headset

- * Turn off the headset before being placed in your pocket or bag in case any unintended call dialed by accidental MFB activation.
- * Don't expose the headset to liquid, moisture or humidity circumstances as it is not waterproof.
- * Don't clear the headset with abrasive cleaning solvents.
- * Don't dispose the headset in extreme temperature conditions. The best store temperature range is from -10 to +60, otherwise the life span of the headset will be influenced.

- * Don't expose the headset in fire as it will cause explosion.
- * Don't let the headset touch any sharp objects to avoid any scratch or damage.
- * Don't attempt to insert object in the headset as it will cause damage of inside components.
- * Don't attempt to disassemble the headset as it does not contain serviceable components.
- * If you do not use the headset for a long period, make sure put it in a dry place; or recharge it after being placed more than one month to make the battery and headset workable. Be away from extreme temperature and dusty circumstances.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
